JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 360 Nos. 1 and 2 30 NOVEMBER 1993

CONTENTS

Voltammetry of labile metal–complex systems with induced reactant adsorption. Theoretical analysis for any ligand-to-metal ratio
J. Puy, J. Salvador, J. Galceran (Lleida, Spain), M. Esteban, J.M. Díaz-Cruz and F. Mas (Barcelona, Spain) 1

Solubility, diffusion coefficient and ionic conductivity of alkyl viologens in poly(ethylene oxide) and its derivatives
H. Ohno and H. Satoh (Tokyo, Japan) 27

Polarographic and coulometric studies on aquo ions of molybdenum in 0.1 M H_2SO_4
M. Bertotti and R. Tokoro (São Paulo, Brazil) 39

Stability of Prussian Blue films on ITO electrodes: effect of different anions
A. Roig, J. Navarro, R. Tamarit and F. Vicente (Burjassot, Spain) 55

A new type of piezoelectric detector in liquid. Part 2. Computation of the equivalent circuit parameters of a piezoelectric crystal with a separated electrode and of series piezoelectric sensors in a non-electrolyte solution
S. Dazhong, N. Lihua and Y. Shouzhuo (Changsha, China) 71

Behaviour of Pt(111) in the presence of the sulphate anions in NaOH solution
E. Morallón, J.L. Vázquez, A. Aldaz (Alicante, Spain) and R.S. Zhai (Ulm, Germany) 89

Impedance studies of porous lanthanum-phosphate-bonded nickel electrodes in concentrated sodium hydroxide solution
P. Los, A. Lasia, H. Ménard (Sherbrooke, Que., Canada) and L. Brossard (Varennes, Que., Canada) 101

Use of dynamically adaptive grid techniques for the solution of electrochemical kinetic equations. Part 1. Introductory exploration of the finite-difference adaptive moving grid solution of the one-dimensional fast homogeneous reaction–diffusion problem with a reaction layer
L.K. Bieniasz (Aarhus, Denmark) 119

Electropolymerization of a homologous series of dipyrrol-1-ylalkanes
W.N.C. Garrard and A.C. Partridge (Melbourne, Australia) 139

Reproducible tritium generation in electrochemical cells employing palladium cathodes with high deuterium loading
F.G. Will, K. Cedzynska and D.C. Linton (Salt Lake City, UT, USA) 161

Modified polyaniline through simultaneous electrochemical polymerization of aniline and metanilic acid
J.Y. Lee, C.Q. Cui, X.H. Su and M.S. Zhou (Singapore) 177

Tangled 3-functionalized polypyrrole derivatives built around $Cu(dpp)_2^+$ (dpp = 2,9-diphenyl-1,10-phenanthroline)
G. Bidan, B. Divisia-Blohorn, M. Billon (Grenoble, France), J.M. Kern and J.P. Sauvage (Strasbourg, France) 189

The temperature coefficient of the potential of zero charge of stepped faces of gold in contact with aqueous perchloric acid solutions
F. Silva, M.J. Sottomayor and A. Martins (Porto, Portugal) 199

Quantitative determination of erythromycin and its hydrolysis products by cyclic voltammetry at the interface between water and 1,2-dichloroethane
L.M. Yudi, A.M. Baruzzi and V. Solis (Cordoba, Argentina) 211

An electrochemical study of antimony cathodes in tetraalkylammonium electrolyte solutions
M.M. Fidler, V. Svetličić and E. Kariv-Miller (Minneapolis, MN, USA) 221

Photoelectrochemistry of TiO_2 particles: efficient electron transfer from the TiO_2 particles to a redox enzyme
R. Cai, R. Baba, K. Hashimoto (Tokyo, Japan), Y. Kubota (Yokohama, Japan) and A. Fujishima (Tokyo, Japan) 237

Metals and alloys bonded on solid polymer electrolyte for electrochemical reduction of pure benzaldehyde without liquid supporting electrolyte
Y.-L. Chen and T.-C. Chou (Tainan, ROC) 247

In-situ X-ray absorption near-edge structure: a probe of the oxidation state of underpotentially adsorbed metals
A. Tadjeddine (Meudon, Orsay, France), A. Lahrichi (Meudon, France) and G. Tourillon (Orsay, France) 261

Temperature and concentration dependence of the activity of quinones of presumed inhibiting action
E. Slavcheva, E. Sokolova and S. Raicheva (Sofia, Bulgaria) 271

The theory of in-situ electrochemical ESR at a channel electrode: EC_2 reaction
Z. Wang and Y. Wu (Beijing, China) 283

Short communications

The promoter action of a polyaniline film electrode on the electrochemical reaction of mercapto-ethanol
Y. Zhou, G. Zhu and E. Wang (Changchun, China) 293

Linear dependence of the standard ion transfer potentials of heteropoly and isopoly anions at the 1,2-dichloroethane/water interface on their surface charge densities
T. Osakai, S. Himeno, A. Saito, K. Maeda and H. Katano (Kobe, Japan) 299

A simple method for heating micro electrodes in-situ
P. Gründler, T. Zerihun, A. Möller and A. Kirbs (Rostock, Germany) 309

Preliminary notes

X-Ray standing wave study of copper underpotentially deposited on Au(100)
H.D. Abruña (Ithaca, NY, USA and Madrid, Spain), T. Gog, G. Materlik (Hamburg, Germany) and W. Uelhoff (Jülich, Germany) 315

Displacement of adsorbed iodine on platinum single-crystal electrodes by irreversible adsorption of CO at controlled potential
J. Clavilier, R. Albalat (Meudon, France), R. Gómez, J.M. Orts and J.M. Feliu (Alacant, Spain) 325

Gold electrode modification with a monolayer of molecular lines consisting of electron carriers with different redox potentials
E. Katz and H.-L. Schmidt (Freising-Weihenstephan, Germany) 337

The electrochemistry exhibited by zeolite-hexacyanoferrate modified electrodes. A comment on the paper by Bharathi, Phani, Joseph, Pitchumani, Jeyakumar and Rao
M.D. Baker and C. Senaratne (Guelph, Ont., Canada) 343

Reply to the comment on "zeolite matrix effects on the electrochemistry of metal hexacyanoferrates"
S. Bharathi, K.L.N. Phani, J. Joseph, S. Pitchumani, D. Jeyakumar and G.P. Rao (Karaikudi, India) 347

Nomenclature, symbols and definitions in electrochemical engineering
G. Gritzner (Linz, Austria) and G. Kreysa (Frankfurt am Main, Germany 351
